SECTION 1 CHEMICAL PRODUCT / NAME

Product/Chemical Name: **C3909A / WX MICR**
CTG Product No: **BC09M**
CAS Number: Mixture
Other Designations: N/A
General Use: Laser Printer

SECTION 2 COMPOSITION / INFORMATION ON INGREDIENTS

Ingredient Name:	CAS NUMBER	EU NUMBER	%	OSHA PEL	ACGIH TLV	OTHER LIMITS
				Toner is regulated under OSHA as particulate not otherwise regulated:		
					ACGIH TLV 10mg/m^3	
Iron Oxide (Black Pigment)	1317-61-9		25-45			

All Other ingredients not considered hazardous under the Federal Hazard Communications Standard.

In a chronic inhalation study in rats using a special test toner, there were no lung changes at all in the lowest exposure level (1 mg/m ^{3}.) the most relevant level to potential human exposures. A very slight degree of fibrosis was noted in 25% of the animals at the middle exposure level (4 mg/m ^{3}) while a slight degree of fibrosis was observed at the highest level (11mg/m ^{3}) in all animals. These findings are attributed to "lung overload", a generic response to excessive amounts of any dust in the lung for a prolonged interval. The special test toner was ten times more respirable than commercially available toner to comply with EPA testing protocol.

On the basis of this information, an exposure limit of 2.5 mg/m^3 (total dust) is recommended.

SECTION 3 HAZARDOUS IDENTIFICATION

NFPA/HMIS	
HEALTH	1
FLAMMABIL	1
REACTIVITY	1
PPE (Sec.8)	-

Primary Entry Routes: Inhalation
Target Organs: N/A
Acute Effects: N/A
Inhalation: Slight irritation of respiratory tract.
Eye: Dust may cause irritation by mechanical abrasion.
Skin: Slight irritation.
Ingestion: None known.
Carcinogenicity: N/A
Medical Conditions Aggravated By Long-Term Exposure: Accumulation of dust in the respiratory system may cause congestion.
Chronic Effects: If these materials are used in a manner that could generate airborne particles (dust), it is recommended that the dust may be treated as a NUISANCE PARTICULATE according to the American Conference of Government Industrial Hygienists (ACGIH)(TLV=10mg/m^3).

SECTION 4 FIRST AID MEASURES

Inhalation: Remove to fresh air. Treat any irritation symptomatically. Call a physician if condition persists.
Eye Contact: In case of contact immediately flush with plenty of low pressure water for at least 15 minutes. Remove any contact lenses to ensure thorough flushing.
Skin Contact: Wash well with soap and running water.
Ingestion: N/A
After first aid, get appropriate in-plant paramedic or community medical support if serious signs and symptoms persist.
Note to Physicians: N/A
Special Precautions / Procedures: N/A

SECTION 5 FIRE FIGHTING MEASURES

Flash Point: N/A
Flash Point Method: N/A
Burning Rate: N/A
Auto Ignition Temperature: Not Determined
LEL: N/A
UEL: N/A
Flammability Classification: 1 Slight (HMIS, NFPA)
Extinguishing Media: Water spray, dry chemical, foam, carbon dioxide, or halon type extinguishers.
Unusual Fire of Explosion Hazards: May form flammable dust-air mixture.
Hazardous Combustion Products: Carbon monoxide, carbon dioxide, nitrogen oxide and smoke. Under certain conditions some aliphatic aldehydes and carboxylic acids may form.
Fire-Fighting Instructions: Do not release runoff from fire controls methods to sewers or waterways.
Fire-Fighting Equipment: Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with full facepiece operated in pressure-demand or positive-pressure mode.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Spill / Leak Procedures: N/A
Small Spills: Scoop into a container for disposal, suction up remaining material with a high efficiency vacuum cleaner.
Large Spills: Scoop into a container for disposal, suction up remaining material with a high efficiency vacuum cleaner.
Containment: For large spills, avoid suspending particles, collect for later disposal. Do not release into sewers or waterways.
Cleanup: No special requirements.
Regulatory Requirement: N/A

SECTION 7 HANDLING AND STORAGE

Handling Precautions: Keep containers closed at all times. Avoid creating dust. Keep away from ignition sources.
Storage Requirements: Store in a cool, dry location.
Regulatory Requirement: N/A

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls:
Ventilation: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (sec.2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.
Administrative Controls:
Respiratory Protection: Seek professional advise prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or nonroutine operation (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. *Warning! Air-purified respirators do not protect workers in oxygen-deficient atmospheres.*
Protective Clothing/Equipment: Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29CFR 1910.133). Contact lenses are not eye protective devices. Appropriate protection must be worn instead of, or in conjunction with contact lenses.
Safety Stations: Make emergency eyewash stations and washing facilities available in work area.
Contaminated Equipment: Separate contaminated work clothing from street clothes. Launder before re-use. Remove this material from your shoes and clean personal protective equipment.
Comments: Never eat, drink, or smoke in works areas. Practice good personal hygiene after using this material, especially before eating, drinking, using the toilet, or applying cosmetics.
