Section 4: FIRST AID MEASURES

If Inhaled: Remove from area to fresh air. Get immediate medical attention. If not breathing, clear airway and start artificial respiration. If victim is having trouble breathing, give supplemental oxygen if available.

If on skin: Wash with plenty of running water and soap if available for 15 minutes. Remove contaminated clothing and shoes. Get immediate medical attention. Wash clothing and decontaminate shoes before reuse.

Section 4: FIRST AID MEASURES - continued

- If in eyes:** Immediately flush eyes with large amounts of running water for at least 15 minutes. Hold eyelids apart to ensure rinsing of the entire surface of the eye and lids with water. Get immediate medical attention.
- If ingested:** If swallowed, immediately give 3-4 glasses of milk (in unavailable, give water.) Do not induce vomiting. If vomiting does occur, give fluids again. Get immediate medical attention. Have physician determine if patient's condition allows for induction of vomiting or evacuation of the stomach. Do not give anything by mouth to an unconscious or convulsing person. Note to Physician: Possible mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, as well as oxygen and measures to support breathing manually or mechanically may be needed.

Section 5: FIRE FIGHTING MEASURES

- | | | | |
|--------------------------------------|---|-----------------------------------|-----------|
| Flash Point: | > 200°F | Auto Ignition Temperature: | Not Known |
| Lower Explosion Limit: | Not known | Upper Explosion Limit: | Not Known |
| Suitable Extinguishing Media: | Use Dry chemical, CO2, water spray or "alcohol" foam. | | |
| Extinguishing Media to Avoid: | High volume jet water. | | |
| Products of Combustion: | Ammonia, Nitrogen Chloride, Nitrogen Oxides | | |
| Special Protective Equipment: | Must wear NIOSH/MSHA approved self-containing breathing apparatus and protective clothing. Cool fire-exposed containers with water spray. | | |

Section 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions: DANGER! May cause severe irritation. Wear appropriate protective equipment and NIOSH/MSHA approved respirator where mists or vapors of unknown concentrations may be generated. Self-contained breathing apparatus may be necessary for very large spills.

Environmental Precautions: Do not allow into open waterways and ground water systems.

Method for Containment: Remove all persons from spill area. Dike and contain spill with inert material (sand, earth, clay, etc.).

Method for Clean Up: Transfer the liquid and solid separately to containers for recovery or disposal.

Section 7: HANDLING AND STORAGE

Handling: Keep container tightly closed. Ensure adequate ventilation. Keep out of reach of children.

Storage: Maximum Storage Temperature is 140°F. Do not contaminate drinking water, food or feed by storage or disposal.

PESTICIDE STORAGE: Open dumping is prohibited. Store in original container in areas inaccessible to children.

Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

- | | | |
|-------------------------------|------------------------------|-----------|
| Exposure Limit Values: | OSHA PEL | ACGIH TLV |
| Ethanol | 1000 ppm PEL; 1900 mg/m3 PEL | |

Effects of Overexposure: No health effects information available for human exposure. Based on the available animal toxicity information for similar materials, it is anticipated that direct contact with this concentrate may possibly produce severe eye or skin irritation. Prolonged exposures may cause: headache, irritation of the eyes, nose and throat, drowsiness, lassitude, loss of appetite and inability to concentrate. Prolonged contact with concentrate may cause chemical burns with possible irreversible damage.

Ingestion may cause burning pain in the mouth, throat and abdomen; swelling of the larynx; circulatory shock and/or convulsions. Mists or vapors of this concentrate may cause irritation of mucous membranes.

Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION**Exposure Controls:**

Engineering:	In processes where mists or vapors may be generated, proper ventilation must be provided in accordance with good ventilation practices.
Eye Contact:	Where chemical splash goggles where there is potential for eye contact. Use safety glasses with side shields when there is no potential for eye contact.
Respiratory:	When necessary, NIOSH/MSHA jointly approved respirator is advised in the absence of proper environmental controls.
Skin Contact:	Rubber or neoprene, to prevent skin contact with concentrate.
Other	Eye wash; safety shower; protective clothing (long sleeves, coveralls, or other, as appropriate), when needed to prevent skin contact.

Section 13: DISPOSAL CONSIDERATIONS

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable containers. Do not reuse or refill this container. Clean containers promptly after emptying. Triple rinse as follows: Fill containers ¼ full with water and reclose the container. Agitate vigorously, and dispose of rinsate consistent with pesticide disposal instructions. Repeat two more times. Then offer for recycling if available or puncture and dispose in sanitary landfill or by other procedures approved by state and local authorities. Follow pesticide disposal instructions for rinsate. If not triple rinsed, these containers are acute hazardous wastes and must be disposed in accordance with local, state, and federal regulations.
