This product is a consumer product which is used in a hermetically sealed state. So, it is not an object of the SDS system. This document is provided to customers as reference information for the safe handling of the product. The information and recommendations set forth are made in good faith and are believed to be accurate at the date of preparation. Panasonic Corporation makes no warranty expressed or implied.

PRODUCT SAFETY DATA SHEET

1 Product and Company Identification

Name of Product	: Manganese lithium rechargeable battery (ML Series)
Name of Company	: Panasonic Corporation, Automotive & Industrial Systems Company
Address	: 1-1 Matsushita-cho, Moriguchi City, Osaka, 570-8511, Japan
Division	: Energy Device Business Division
Department	: Engineering Department
Telephone number	: +81-6-6994-4537

2 Hazards Identification	
GHS Classification	: Not applicable
Hazard	: Electrolyte and lithium metal are inflammable.
	Risk of explosion by fire if batteries are disposed in fire or heated above 100 degrees C.
	Stacking or jumbling batteries may cause external short circuits, heat generation, fire or explosion.
Toxicity	: Vapor generated from burning batteries, may irritate eyes, skin and throat.

3 Composition/Information of Ingredients

Component	Material	CAS No.	Content
Positive electrode	Lithium manganese oxide	12057-17-9	9 28wt%
Negative electrode	Lithium	7439-93-2	0.4 3wt%
	Aluminum	7440-32-6	2 11wt%
Electrolyte	1,2-dimethoxyethane	110-71-4	1 4wt%
	Organic electrolyte	-	3 11wt%
Others	Steel	7439-89-6, 7440-47-3	60 85wt%
(Steel or Plastic parts)	Polypropylene	9003-07-0	1 15wt%

Lithium content per cell

4 First Aid Measures

The product contains organic electrolyte. In case of electrolyte leakage from the battery, actions described below are required.

Eye contact	: Flush the eyes with plenty of clean water for at least 15 minutes immediately, without rubbing. Get immediate medical treatment. If appropriate procedures are not taken, this may cause eye injury.
Skin contact	: Wash the contact areas off immediately with plenty of water and soap. If appropriate procedures are not taken, this may cause sores on the skin.
Inhalation	: Remove to fresh air immediately. Get medical treatment immediately.

5 Fire Fighting Measures

Extinguishing method	: Since vapor, generated from burning batteries may make eyes, nose and
	throat irritates, be sure to extinguish the fire on the windward side. Wear the
	respiratory protection equipment in some cases.

Fire extinguishing agent : Alcohol-resistant foam and dry sand are effective.

6 Accidental Release Measures (in case of electrolyte leakage from the battery)

- Take up with absorbent cloth, treat cloth as inflammable.
- Move the battery away from the fire.

7 Handling and Storage

- When packing the batteries, do not allow battery terminals to contact each other, or contact with other metals. Be sure to pack batteries by providing partitions in the packaging box, or in a separate plastic bag so that the single batteries are not mixed together.
- Use strong material for packaging boxes so that they will not be damaged by vibration, impact, dropping and stacking during their transportation.
- Do not mix different type of batteries.
- Do not solder directly onto batteries.
- Do not let water penetrate into packaging boxes during their storage and transportation.
- Do not store the battery in places of the high temperature or under direct sunlight.
- Please also avoid the places of high humidity. Be sure not to expose the battery to condensation, rain or frozen condition.

1-1 Matsushita, Moriguchi City, Osaka 570-8511, Japan Tel +81-6-6991-1141 http://panasonic.net/ec/

8 Exposure Controls and Personal Protection (in case of electrolyte leakage from the battery)

 Acceptable concentration
 : Not specified in ACGIH.

 Facilities
 : Provide appropriate ventilation system such as local ventilator in the storage place.

 Protective clothing
 : Self-Contained Breathing Apparatus for organic gases, safety goggle, and safety glove.

9 Physical and Chemical Properties

Appearance	: Coin shape
Voltage	: 3 volts

10 Stability and Reactivity

Since batteries utilize a chemical reaction they are actually considered a chemical product. As such, battery performance will deteriorate over time even if stored for a long period of time without being used. In addition, the various usage conditions such as discharge, ambient temperature, etc. are not maintained within the specified ranges the life expectancy of the battery may be shortened or the device in which the battery is used may be damaged by electrolyte leakage.

11 Toxicological Information (in case of electrolyte leakage from the battery)

Acute toxicity	: Oral(rat) LD50 = 200 2,000mg/kg (estimated)
Irritation	: Irritating to eye and skin.
Mutagenicity	: Not specified.
Chronic toxicity	: Not specified.

12 Ecological Information

In case the worn-out battery is disposed of on land, the battery case may corrode and leak electrolyte.

13 Disposal Considerations

When the battery is worn out, dispose of it under the ordinance of each local government.

14 Transport Information

During the transportation of a large amount of batteries by ship, trailer or railway, do not leave them in the places of high temperatures and do not allow them to be exposed to condensation.

During the transportation do not allow packages to be dropped or damaged.

Proper shipping name	: Lithium metal batteries
UN Number, UN Class	: UN3090, Class9 (for the Air transport by PI968 Section IA or IB)
: E	xemption (for the Marine transport and the Air transport by Section II of PI 968, 969 or 970)
	Even though the cells are classified as lithium metal batteries (UN3090 or 3091)
	they are not subject to some requirements of Dangerous Goods Regulations
	because they meet the following:
	1. for cells, the lithium content is not more than 0.3g;
	2. each cell is of the type proven to meet the requirements of each test in the
	UN Manual of Tests and Criteria, Part, sub-section 38.3.
	each cell is manufactured in ISO9001 certified factory.

Please refer to the following reference information about concrete ways of transportation. Actual content of packaging label and shipping documents varies by shipping companies. Make sure to confirm in advance with your shipping company.

	Reference	Packing Instruction(PI)/ Special provision(SP)	Note
Air transport	IATA (2)(5)	PI 968 Section A	Cells, Cargo Aircraft only; Net quantity per package Max. 35kg
		PI 968 Section B	Cells, Cargo Aircraft only; net quantity per package Max. 2.5kg
		PI 968 Section	Cells, Cargo Aircraft only, not more than one package in any single consignment; net quantity per package Max. 2.5kg
		PI 969 Section	Cells packed with equipment
		PI 970 Section	Cells contained in equipment, button cell batteries
Marine transport	IMDG (3)	SP 188

The first edition : January 30, 2007 Revised date : January 14, 2015 Document Number : MS621FE-031

SAFETY DATA SHEET (SDS)

SECTION 1: Product and Company Identification

Product Name	MS Lithium Rechargeable Battery		
Model Name:	MS621FE (with Tab)		
Nominal Voltage:	3.0 V		
Nominal Capacity:	5.5 mAh (3.1 V-2.0 V)		
Manufacturer Address:	Seiko Instruments Inc. Micro-Energy Division 45-1, Aza Matsubara, Kamiayashi, Aoba-ku, Sendai-shi, Miyagi, Japan		
Telephone:	+81-22-391-9331 Facsimile: +81-22-391-9330		
Seller Address:	Seiko Instruments Inc. Micro-Energy Division Sales Department 8, Nakase 1-chome, Mihama-ku, Chiba-shi, Chiba, Japan		
Telephone:	+81-43-211-1735 Facsimile: +81-43-211-8034		
Emergency Contact	International / call +81-22-391-9331 (Seiko Instruments Inc.) North America / call 800-424-9300 (CHEMTREC)		

SECTION 2: Hazards Identification

GHS Classification	Not applicable
Effects to Human body	When swallowed, the battery can melt, and it might cause inflammation in stomach or intestine.
Possibility of Fire ignition	When exposed to fire or extreme heat, it may catch fire, generate heat, leakage or it may burst.

SECTION 3: Composition/Information on Ingredients

Substance/Preparation	Article
Important Note	The battery should not be opened or burned, because the following ingredients listed below are contained in it. Its post-discharge or its combustion products could be harmful.

Materials or Ingredients

Part Name	Material Name	CAS No.
Anode	Lithium-Silicon composite oxide	10097-28-6/based material
Cathode	Lithium-Manganese composite oxide	-
Solute	Lithium imide salt	-
Solvent	Cyclic carbonate and Chain ether	-
Cases	Nickel plated stainless steel	-
(Tab)	Nickel plated stainless steel	-
(Solder)	100% of Tin	7440-31-5

[MS Lithium Rechargeable Battery]

SECTION 4: First Aid Measures

None unless exposed to internal materials. If contents leak, observe the following instructions:

Inhalation:	Fumes can cause respiratory irritation. Ensure the person has fresh air and consult a physician.
Skin:	Immediately wash the skin with plenty of water. If itchiness or irritation due to chemical burns persists, consult a physician.
Eyes:	Immediately rinse the eye with plenty of water.
Ingestion:	If a battery is swallowed, consult a physician immediately. If the contents come into contact with the mouth, immediately rinse with of water and consult a physician.

SECTION 5: Fire Fighting Measures

How to Extinguish Use fire extinguisher (for Lithium Battery) or Sand.

Keep away the batteries from heat sources to avoid a fire. Please do not expose the battery to very high temperature to prevent an explosion and the generation of harmful gas.

SECTION 6: Accidental Release Measures

N/A (Not Applicable)

SECTION 7: Handling and Storage

Handling	Do not charge by higher current or higher voltage than specified.
	Do not heat, disassemble nor dispose of in fire.
	Do not solder directly to the battery. Do not short.
	Do not reverse placement of (+) and (-).
	Do not discharge by force.
	In case of leakage or a strange smell, keep away from fire to prevent ignition of any leaked electrolyte.
	In case of disposal, insulate between (+) and (-) of battery by an insulating material.
	If leaked liquid gets in the eyes, wash them with clean water and consult a physician immediately.
	Do not use new and used batteries together. Do not use different types of batteries together.
	If you connect two or more batteries in series or parallel, please consult us in advance.
	Do not use nor leave the batteries in direct sunlight nor in high-temperature areas.
	Do not apply strong pressure to the batteuries nor handle roughly.
	Avoid contact with water.
Storage	Keep batteries out of children's reach.
	Keep batteries away form direct sunlight, high temperature and humidity. Avoid having the batteries touch each other, because short-circuit causes ignition, leakage, or rupture.

SECTION 8: Exposure Controls / Personal Protection

The battery is sealed with a metal can in order to avoid leakage of harmful gas or liquid. Follow the instructions in the SECTION 7.

Respiratory Protection:	N/A
Protective Gloves:	N/A
Eye Protection:	N/A
Skin or Body Protection:	N/A

SECTION 9: Physical and Chemical Properties

Shape	Button battery
Chemical System	Lithium-Manganese composite oxide/ Lithium-Silicon composite oxide
Rechargeable	YESNO

SECTION 10: Stability and Reactivity

Stability:StableCondition to Avoid:See section 7Hazardous Mixture:N/AHazardous Decomposition or Byproducts:N/A

SECTION 11: Toxicological Information

N/A

SECTION 12: Ecological Information

N/A

SECTION 13: Disposal Considerations

Dispose of the battery in accordance with the respective national, federal, state, and local regulations.

SECTION 14: Transport Information

United Nations Number	UN3090 (battery in apparatus :UN3091)
Shipping Name	Lithium metal battery
UN Hazard Classification	Class 9
Regulation	Each organizations of transportation has defined the following regulations. Their regulations are based on the United Nations Regulations, Each special provision provides specifications on exceptions and packaging for lithium batteries shipping.

Method	Organization	Regulation	Special Provision
Air	IATA/ICAO	DGR/TI	Section II of PI968-970
			A88、A99、A154、A165、A183、A201
Marine	IMO	IMDG Code	SP188
U.S.A	DOT	49CFR	49CFR Section 173、185

When battery is conveyed with packing of SII; This Lithium metal batteries, NOT RESTRICTED as per Section II of PI 968. (Only packing for overseas)

<lithium content=""></lithium>	The Lithium content is not more than 1.0 g. %The Lithium of this battery is 0.0032 g, and conforms to a standard.
<safety certification=""></safety>	Each cell is of a type proven to meet the requirement of each test in the UN Manual of Tests and Criteria, Part III, sub-section38.3. %This battery has satisfied the UN38.3 test.
<strong packaging="">	Cells are separated so as to prevent short circuits and are packed in strong packaging. (The cell together with apparatus is excepted.)
<caution label=""></caution>	Each packages must be displayed a battery handling label. (Telephone number must be printed for emergency call on the handling label.)
<cao label=""></cao>	Each packages for air transport must be displayed Cargo Aircraft Only label.
<not declaration="" restricted=""></not>	Each consignment must be accompanied with a declaration of Not Restricted goods document. (Telephone number must be printed for emergency call on the handling label.)
<package drop="" test=""></package>	Each package must be capable of withstanding a 1.2 m drop test. (The cell together with apparatus is excepted.)
<weight> kg or less for lit</weight>	The maximum net quantity of one package is restricted in air transport, 2.5 hium metal cells. (The cell together with apparatus is excepted.)

SECTION 15: Regulatory Information

United Nations Regulations

- ·ICAO Technical Instructions for the safe transport of dangerous good by air
- ·IATA Dangerous Goods Regulations

SECTION 16: Other Information

SDS is not applied to products that are used in a sealed condition. So, we do not have the obligation to publish this document since the battery corresponds to the condition above. But, we offer this document for reference. The data and evaluation results written on this document was known at the time of preparation, but it is not something that is guaranteed.
