-		: Not Determined
-	N/A	
	N/A	
Flammability C		n: 1 Slight (HMIS, NFPA)
Extinguishing		
		Water spray, dry chemical, foam, carbon dioxide, or halon type extinguishers.
Unusual Fire o		
Hazardous Co	moustion Pr	
		Under certain conditions some aliphatic aldehydes and carboxylic acids
		may form.
		Do not release runoff from fire controls methods to sewers or waterways.
Fire-Fighting E	Equipment:	Because fire may produce toxic thermal decomposition products, wear a
		self-contained breathing apparatus (SCBA) with full facepiece operated
		in pressure-demand or positive-pressure mode.
		AL RELEASE MEASURES
Spill / Leak Pro		N/A
Small Spills:	Scoop into a	container for disposal, suction up remaining material with a high efficiency
	vacuum clea	ner.
Large Spills:	Scoop into a	container for disposal, suction up remaining material with a high efficiency
	vacuum clea	ner.
Containment:	For large spi	lls, avoid suspending particles, collect for later disposal. Do not release
	into sewers of	or waterways.
Cleanup:	No special re	equirements.
Regulatory Re	quirement:	N/A
SECTION 7 H	HANDLING	AND STORAGE
Handling Preca	autions:	Keep containers closed at all times. Avoid creating dust. Keep away from ignition sources.
Storage Requi	rements:	Store in a cool, dry location.
Regulatory Re	quirement:	N/A
SECTION 8 E	EXPOSURE	CONTROLS / PERSONAL PROTECTION
Engineering C	ontrols:	
Ventilation:	Provide gene	eral or local exhaust ventilation systems to maintain airborne concentrations
	below OSHA	PELs (sec.2). Local exhaust ventilation is preferred because it prevents contaminant
		to the work area by controlling it at its source.
Administrative	Controls:	
Respiratory Pr	otection:	Seek professional advise prior to respirator selection and use.
		Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear
		a MSHA/NIOSH-approved respirator. Select respirator based on its suitability
		to provide adequate worker protection for given working conditions, level of
		airborne contamination, and presence of sufficient oxygen. For emergency or
		nonroutine operation (cleaning spills, reactor vessels, or storage tanks), wear
		an SCBA. Warning! Air-purified respirators do not protect workers in oxygen-deficient
		atmospheres.
Protective Clot	thing/Equips	
FIOLECTIVE CIO	uning/Equipi	prolonged or repeated skin contact. Wear protective eyeglasses or
		chemical safety goggles, per OSHA eye and face protection regulations
		(29CFR 1910.133). Contact lenses are not eye protective devices. Appropriate
		protection must be worn instead of, or in conjunction with contact lenses.
Safety Stations		emergency eyewash stations and washing facilities available in work area.
Contaminated	Equipment:	Separate contaminated work clothing from street clothes. Launder before
		re-use. Remove this material from your shoes and clean personal protective
		equipment.
		rink, or smoke in works areas. Practice good personal hygiene after using this
