REPORT NO.: LCS200918096ASD

Version: V1.4

* The SDS is prepared based on the information provided by client. The contents and formats of this SDS are revised as per client's request. **Section 1- Identification** (a) Product identifier Li-ion Battery Product name (b) Other means of identification Model: 18650 3S1P Nominal Voltage: 11.1V Nominal capacity: 2000mAh Product description Watt-hour: 22.2Wh Weight: 157.6g

(c) Recommended use of the chemical and restrictions on use LITHIUM ION BATTERIES Recommended use No information available. Uses advised against (d) Details of the supplier of the safety data sheet Supplier Name Supplier Address Manufacture Company

(e) Emergency telephone number

Section 2- Hazards identification

(a) Classification

Manufacture Address

Supplier Phone Number

This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200). This product is an article which is a sealed battery and as such does not require an MSDS per the OSHA hazard communication standard unless ruptured. The hazards indicated are for a ruptured battery.

Reproductive toxicity	Category 2
Acute toxicity-Oral	Category 3
Skin corrosion/ irritation	Category 1
Specific target organ toxicity-repeated exposure	Category 1

(b) GHS Label elements, including precautionary statements

Emergency Overview

According to 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

REPORT NO.: LCS200918096ASD

Version: V1.4

Signal word Danger

Hazard Statements

Suspected of damaging fertility or the unborn child Toxic if swallowed

Causes severe skin burns and eye damage

Cause damage to organs through prolonged or repeated exposure.

Appearance:	No information available	Physical State: Solid	Odor: No information available

(c) Hazards not otherwise classified (HNOC)

Not applicable

(d) Unknown Toxicity

32% of the mixture consists of ingredient(s) of unknown toxicity

According to 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

REPORT NO.: LCS200918096ASD

Version: V1.4

(e) Other information

Very toxic to aquatic life with long lasting effects

(f) Interactions with Other Chemicals

No information available.

Section 3- Composition/information on ingredients

Chemical Name	CAS Number	Weight (%)	Trade Secret
Lithium Cobalt Oxide (CoLiO ₂)	12190-79-3	38.56	*
Copper	7440-50-8	6.26	*
Graphite	7782-42-5	37.91	*
Phosphate(1-), hexafluoro-, lithium	21324-40-3	4.54	*
Aluminum foil	7429-90-5	12.73	*

[&]quot;*" The exact percentage (concentration) of composition has been withheld as a trade secret.

Section 4- First-aid measures

Description of first aid measures

- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Immediately rinse with water.
- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing: If symptoms persist consult doctor.
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- Indication of any immediate medical attention and special treatment needed No further relevant information available.

Section 5- Fire-fighting measures

(a) Suitable Extinguishing Media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

(b) Unsuitable extinguishing media

CAUTION: Use of water spray when fighting fire may be inefficient.

(c) Specific Hazards Arising from the Chemical

The product causes burns of eyes, skin and mucous membranes. Thermal decomposition can lead to release of irritating gases and vapors.

(d) Hazardous Combustion Products

Carbon oxides.

(e) Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Section 6- Accidental release measures

According to 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

REPORT NO.: LCS200918096ASD

Version: V1.4

(a) Personal precautions, protective equipment and emergency procedures

If the battery is released, remove personnel from area until fumes dissipate. Provide maximum ventilation to clear out hazardous gases. The preferred response is to leave the area and allow the vapors to dissipate. Avoid skin and eyes contact or inhalation of vapors. Remove spilled liquid with absorbent and incinerated. If leakage of the battery happens, liquid could be absorbed with sand, earth or other inert substance and contaminated area should be ventilated meantime.

(b) Environment precautions

Do not allow product to reach sewage system or any water source.

Inform respective authorities in case of seepage into water course or sewage system.

Do not allow to enter sewers surface or ground water.

(c) Methods and material for containment and cleaning up

If battery casing is dismantled, small amounts of electrolyte may leak. Collect all released material in a plastic lined container. Dispose off according to the local law and rules. Avoid leached substances to get into the earth, canalization or waters.

Section 7- Handling and storage

(a) Precautions for safe handling

Handling

Handle in accordance with good industrial hygiene and safety practice. Wear personal protective equipment. Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. Do not eat, drink or smoke when using this product. Take off contaminated clothing and wash before reuse.

(b) Conditions for safe storage, including any incompatibilities Storage

Keep containers tightly closed in a dry, cool and well-ventilated place. Store locked up. Keep out of the reach of children.

Incompatible Products

Strong acids. Strong oxidizing agents. Strong bases

Section 8- Exposure controls/personal protection

Hazardous Polymerization	Hazardous polymerization does not occur.
Conditions to avoid	Exposure to air or moisture over prolonged periods. Excessive heat.
Incompatible materials	Acids. Bases. Oxidizing agent.
Hazardous Decomposition Products	Carbon oxides.
Section	n 11 – Toxicological information
Product Information	Product does not present an acute toxicity hazard based on known or supplied information. In case of rupture:
Eye contact	Specific test data for the substance or mixture is not available. Causes burns. (based on components). Corrosive to the eyes and may cause severe damage including blindness. Causes serious eye damage. May cause irreversible damage to eyes.
Skin contact	Specific test data for the substance or mixture is not available. Corrosive. (based on components). Causes burns.

(29 CFR 1910.1200)

REPORT NO.: LCS200918096ASD

Ingestion			Specific test data for the substance or mixture is not available. Causes burns. (based on components). Ingestion causes burns of the upper digestive and respiratory tracts. May cause severe burning pain in the mouth and stomach with vomiting and diarrhea of dark blood. Blood pressure may decrease. Brownish or yellowish stains may be seen around the mouth. Swelling of the throat may cause shortness of breath and choking. May cause lung damage if swallowed. May be fatal if swallowed and enters airways.
